**Georgia Health Advantage Earns Coveted 5-Star Rating from CMS,
Reflecting Exceptional Quality and Care for Georgia Seniors**

*Medicare Advantage Special Needs Plan recognized
among nation's highest-performing plans*

FRANKLIN, Tenn. (November 13, 2025) — [Georgia Health Advantage](#), a Medicare Advantage Institutional Special Needs Plan (ISNP) serving long term care residents across Georgia, has earned a 5-Star quality rating from the Centers for Medicare & Medicaid Services (CMS) — the highest possible rating awarded to health plans nationwide.

The CMS 5-Star designation recognizes outstanding performance across key measures of quality, including clinical outcomes, preventive care, medication management, member experience, and care coordination. Fewer than 10 percent of Medicare Advantage plans nationwide achieve this top rating.

"We are honored to receive a 5-Star rating – this extraordinary accomplishment is a reflection of the compassionate, high-quality care delivered in our Georgia communities every day," said Ronnie Rollins President & CEO of [CHSGa](#). "Georgia Health Advantage is an integral part of our health system and allows us to bring clinical excellence and innovative care coordination to assure that Georgia's long-term care residents receive the best possible care and support."

Georgia Health Advantage is a joint venture between Franklin, Tennessee-based [American Health Plans](#), a division of [American Health Partners](#), and [CHSGa](#), which owns or manages 51 nursing homes across Georgia and provides value-based coordinated care to homebound residents. The plan currently serves 1,858 members in 124 of Georgia's 159 counties, providing an integrated model of care that helps residents stay healthier, avoid unnecessary hospitalizations, and experience a higher quality of life.

The CMS 5-Star Rating System helps Medicare beneficiaries compare health plans based on quality and performance. For Special Needs Plans, the rating specifically measures how effectively a plan supports members with complex health needs through care coordination, prevention, and chronic condition management.

"This achievement reflects the commitment of our care teams and nursing home partners to deliver proactive, personalized care that improves the lives of seniors," said Mike Bailey, CEO of

American Health Partners. "Georgia Health Advantage was founded on the belief that collaboration between health plans and skilled nursing providers leads to better outcomes — and this recognition proves that model works."
